PROFESSIONAL SUMMARY

Fourth-year B.E. Computer Science student with hands-on experience building responsive front-end web applications and a strong foundation in data structures, object-oriented programming, and full-stack web technologies. Currently gaining practical industry exposure through virtual internships in full-stack web development and Generative AI / cloud computing. Passionate about solving real-world problems and contributing to impactful software projects.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

Vidya Vikas Institute of Engineering and Technology, Mysuru — Visvesvaraya Technological University (VTU), Belagavi
Expected Graduation: June 2027

EXPERIENCE

Full Stack Development Intern — Code-A-Nova (Virtual Internship Program)

June 2026 – September 2026 (Ongoing — 1 of 3 months completed)

- Building responsive multi-page web applications, including an Inventory Management System and an Event Management System, using HTML, CSS, and JavaScript
- Designing admin dashboard interfaces to display key operational metrics and implementing client-side interactivity for core management actions

Gen AI & Cloud Computing Virtual Intern — BharatCares (CSRBOX Group), in collaboration with AICTE & IBM SkillsBuild

June 2026 – July 2026 (Ongoing)

- Completing a 6-week industry-aligned academic internship covering Generative AI, prompt engineering, cloud computing, API architecture, and AWS deployment
- Participating in expert-led masterclasses and working toward a capstone AI project as part of the IBM SkillsBuild learning plan

PROJECTS

Event Management System — Front-End Web Application

Technologies: HTML, CSS, JavaScript

- Built a 7-page responsive site (Home, About, Events, Registration, Contact, Login, Dashboard) for managing college events, workshops, and technical fests
- Created an events catalog with detailed cards (date, location, seat availability) and a registration form for event sign-up
- Designed an admin dashboard with registration counts, event statistics, and JavaScript-driven interactive actions

Inventory Management System — Front-End Web Application

Technologies: HTML, CSS, JavaScript

- Developed a multi-page inventory site (Home, Products, Services, About, Contact, Login, Dashboard) to manage products, stock levels, sales, and purchases
- Built a product catalog page displaying pricing, stock availability, and descriptions for multiple product categories
- Designed an admin dashboard summarizing stock, sales, and purchases, with JavaScript functions for add / update / delete actions

SKILLS

Programming Languages: Java, Python, C

Web Technologies: HTML, CSS, JavaScript, React

Backend & Database: Node.js, MySQL, MongoDB, Firebase

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

Tools & Platforms: Git, GitHub

CERTIFICATIONS

- Adobe Experience Cloud – Suite — Infosys Springboard (2026)
- Data Visualization: Empowering Business with Insights — Forage (2026)
- Technology Job Simulation — Deloitte (Forage, 2026)
- GenAI Job Simulation — Forage (2026)
