

FULL STACK DEVELOPER CAREER ROADMAP

Personalized Strategy Report — Prepared by Elite AI Career Strategist

🕒 3-MONTH SPRINT PLAN

📍 Current Position

Student with strong foundation in programming logic (Java, Python, C basics) and front-end basics (HTML/CSS). Comfortable with MS Office & basic computer use. Communication skills at beginner stage.

Java (Basic) Python (Basic) C (Basic) HTML/CSS MS Word/Excel

🎯 Target Goal

Land a **Full Stack Developer job or internship within 3 months** by building an MERN-based project portfolio, sharpening core CS fundamentals, and actively networking with recruiters & the dev community.

Internship-Ready Portfolio-Driven Interview-Prepared

📊 Skill Gap Analysis

Skill Area	Current Level	Required Level (Goal)	Priority
JavaScript (ES6+)	Not started	Strong working proficiency	HIGH
React.js (Frontend)	Not started	Build & deploy UI components	HIGH
Node.js / Express (Backend)	Not started	Build REST APIs	HIGH
Database (MongoDB/SQL)	Not started	CRUD operations, schema design	HIGH
Git & GitHub	Not started	Version control + portfolio hosting	HIGH
HTML/CSS	Basic	Responsive, Flexbox/Grid mastery	MEDIUM
DSA & Problem Solving	Basic (via C/Java)	Interview-level fundamentals	MEDIUM
Communication & Interview Skills	Beginner	Confident technical communication	MEDIUM
Resume, LinkedIn & Portfolio	Not started	Recruiter-ready presence	HIGH

🌟 Recommended Learning Plan

Phase	Focus Areas
Weeks 1-4	JavaScript (ES6+), advanced HTML/CSS (Flexbox/Grid), Git/GitHub basics, start daily DSA (arrays, strings)
Weeks 5-8	React.js (components, hooks, routing), Node.js + Express, REST APIs, MongoDB basics, continue DSA
Weeks 9-12	Full stack integration (MERN), authentication (JWT), deployment (Vercel/Render), resume + mock interviews

🏗️ Suggested Projects

- 1. Personal Portfolio Website**
HTML/CSS/JS responsive site showcasing skills, resume & projects. Deploy on GitHub Pages/Vercel.
- 2. CRUD Task Manager (React + Node + MongoDB)**
Full CRUD app with auth, REST API, and clean UI — demonstrates end-to-end MERN skills.
- 3. Capstone: Full Stack Web App**
E.g. Blog/E-commerce mini-platform with user auth, database, deployed live — flagship portfolio piece.

🌐 Networking Strategy

- Optimize LinkedIn headline & summary as "Aspiring Full Stack Developer"; post weekly build-in-public updates
- Build a clean, active GitHub profile — commit code consistently, pin best 3 projects
- Join dev communities: Discord (100xDevs, freeCodeCamp), LinkedIn groups, Reddit r/webdev
- Connect with 5-10 alumni/recruiters/engineers weekly via personalized LinkedIn messages
- Participate in at least 1 hackathon or open-source contribution before Month 3
- Apply to internships via LinkedIn, Internshala, Unstop, and company career pages weekly

📅 Monthly Milestones

Month 1	Month 2	Month 3
- JS + Git mastery - Portfolio site live - GitHub/LinkedIn setup - DSA: arrays/strings	- React + Node basics - Project 2 completed 10+ network connects - DSA: recursion/OOP	- Capstone deployed - Resume finalized - Mock interviews done - Active applications

🚀 Immediate Next Actions (This Week)

- Create/clean up GitHub and LinkedIn profiles today; add "Aspiring Full Stack Developer" positioning
- Start a structured JavaScript course (freeCodeCamp / MDN) — 1-2 hrs/day
- Set up Git locally, push your first repo (even a "Hello World" project)
- Begin sketching Project 1 (Portfolio Website) wireframe
- Start daily DSA practice (30 min/day) on a beginner track (arrays & strings)
